Scott MacDonald (Hughes)
Technical Consultant

Experienced Full Stack Developer with great technical knowledge surrounding React, Next, JavaScript, TypeScript, AWS, GraphQL, Node and more. Obtained AWS Cloud Practitioner Certification and looking to gain further certifications in the solution architect field. Problem solving fanatic, enthralled with computational thinking and logic. I actively look for opportunities to lead especially in areas where I am an SME and can pass knowledge onto others and help mentor and enable growth.

WatsonX Foundations

Experience

Oct 2021 - Present
IBM | 20 York Rd, London SE1 7ND
Technical Consultant

Within this role my main responsibilities were developing new FE features, fixing and solutioning bugs, planning releases, maintaining/creating new AWS stacks and infrastructure, creating new micro-services, identifying/raising dependencies, issues and risks with the client, collaborating with various international markets, helping run and participating in sprint refinements and planning, help with solutioning of new epics.

Across this role was were I started to develop and deepen my senior knowledge base, and enjoy learning about and stepping more into positions of leadership. I worked with large brands/companies primarily within the automotive space but also in, public sector, healthcare, financial, and retail spaces.

The technologies I used across this role were as follows:

React.js, Javascript, Typescript, Next.js, AWS, Carbon, GraphQL, REST APIs, Jest, React Testing Library, Cypress, Ensighten, AEM, Bloomreach, Github, Vercel, Wiremock, and more.

June 2019 - Aug 2020
IBM | 76/78 Upper Ground, London SE1 9PZ
Junior Interactive Developer (Placement Year)

Over this time my role consisted of maintaining existing applications and developing new applications as part of a 3 person team, using mainly react and javascript. I became an integral developer to the team and began to sharpen my technical knowledge of front-end and some back-end development. The biggest accomplishment across my time here was the release of the part exchange tool which myself and developer owned and created, which received high praise from clients.

August 2015 - June 2019
Jumping Jacks Events Ltd | 49 Jamaica Street, Liverpool, L1 0AH
Creative Lead
